Sauce & Spoon Tablet Rollout

Impact Report

Executive Summary

Sauce & Spoon launched tablets in its restaurant on Oct 15th aiming to improve the guest experience and streamline operations. Results since the rollout have been strongly positive across four areas:

- **Customer satisfaction:** Post-pilot, 72% of respondents rated their tablet experience a **4 or 5** out of 5 possible. After we made improvements based on guest feedback, that **rose to 86%**.
- **Revenue:** Monthly revenue has climbed steadily since launch, with July revenue up to **20%** over April's. Tablets also helped boost sales during the holiday season.
- **Efficiency:** Average daily guest count **rose 10%**, and wait times **dropped by 30 minutes**.
- **Food waste:** Tablets made incorrect orders easier to spot, and kitchen staff used that visibility to **cut food waste by 50%**.

Based on these results, we plan expanding tablets to additional locations (project planning in Q2), continuing to track customer satisfaction through ongoing surveys, and exploring new features such as social media integration, reservations, and videos in Q4.
